About me

Frontend Developer with a passion for building responsive and interactive web applications using **React, JavaScript, and Tailwind CSS**. Currently pursuing **BS Software Engineering (3rd Year)**, with hands-on experience in developing dynamic projects like image galleries, dashboards, weather apps, and interactive web interfaces. Skilled in **UI/UX design, responsive layouts, and DOM manipulation** with a focus on modern, maintainable code.

Technical Skills

- **Frontend:** HTML5, CSS3, SASS/SCSS, Responsive Design, Flexbox, Grid
- **JavaScript:** ES6+, DOM Manipulation, Event Handling, Async/Await, Promises
- **Frameworks/Libraries:** React.js, React Router
- **State Management:** Redux (Basics), Context API
- **Tools:** Git, GitHub, VS Code, Chrome DevTools, NPM, Vite
- **Web Concepts:** HTTP/HTTPS, REST APIs, Client-Server Architecture
- **Other:** JSON, Local Storage, SEO Basics, Performance Optimization

Projects

Productivity Dashboard

– [live link](#)

- A multi-tool productivity web application featuring task management, daily planner, Pomodoro timer, weather updates, and motivational quotes, with persistent data storage using LocalStorage and dynamic UI interactions built with JavaScript.

Weather App

– [live link](#)

- Built a weather application that retrieves real-time weather data using the **Open-Meteo API**, allowing users to search for cities and view temperature, humidity, wind speed, and weather conditions with dynamic UI updates using JavaScript.

React Image Gallery

– [live link](#)

- Developed a dynamic image gallery application that fetches images using the **Lorem Picsum API** and displays them in a responsive grid layout. Implemented category-based filtering (All, Grayscale, Blur), pagination controls, and reusable React components to dynamically render images and manage UI state.
