

HANIA KANWAL

Full Stack Developer · React · Node.js · MongoDB

haniakanwal239@gmail.com | +92 344 152 1995 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building and deploying production-ready web applications using React, Node.js, Express, and MongoDB. Skilled in integrating AI/ML features (MediaPipe face detection), RESTful API design, cloud storage (ImageKit), and modern UI/UX. Currently pursuing BS Software Engineering (3rd Year) with a strong foundation in modern JavaScript.

TECHNICAL SKILLS

Frontend: React.js, HTML5, CSS3, SASS/SCSS, Tailwind CSS, Responsive Design, Flexbox, Grid

Backend: Node.js, Express.js, REST API Design, JWT Authentication, Multer, Cookie-Parser, bcrypt

Database: MongoDB, Mongoose, Schema Design, MongoDB Atlas

JavaScript: ES6+, Async/Await, Promises, DOM Manipulation, Context API, React Router, Redux (Basics)

AI / ML: MediaPipe Face Landmarker, Blendshape Analysis, Real-time Video Processing

Tools: Git, GitHub, VS Code, Vite, NPM, ImageKit CDN, Vercel, Render, Chrome DevTools

Concepts: HTTP/HTTPS, Client-Server Architecture, CORS, MVC Pattern, REST, Performance Optimization

PROJECTS

MoodTunes | AI-Powered Mood-Based Music Player [Live Demo](#)

React.js · Node.js · Express · MongoDB · MediaPipe · ImageKit

- Real-time emotion detection app using MediaPipe Face Landmarker that classifies 4 moods (Happy, Sad, Surprise, Neutral) via weighted blendshape scoring, then auto-plays mood-matched songs from a MongoDB library.
- Full-stack REST API with JWT auth, Multer + ImageKit CDN for song/poster uploads, and a React frontend with custom audio player (queue, next/prev), upload modal, and Context API state — deployed on Render.

Postra | Full Stack Social Media Platform [Live Demo](#)

React.js · Node.js · Express · MongoDB · ImageKit · JWT

- Architected and deployed a full-stack Instagram-inspired platform with JWT-based auth (register, login, logout, account deletion) stored in HTTP-only cookies.
- Implemented profile photo upload using Multer and ImageKit CDN, and built a dynamic feed with real-time like/unlike and follow/unfollow functionality.
- Deployed backend on Render and frontend via Express with proper CORS, environment variables, and MongoDB Atlas configuration for production.

Productivity Dashboard [Live Demo](#)

JavaScript · HTML5 · CSS3 · LocalStorage · REST API

- Built a multi-tool productivity app with task management, Pomodoro timer, daily planner, real-time weather API, and motivational quotes with LocalStorage persistence..

EDUCATION

BS Software Engineering | 2023 – 2027

University of Azad Jammu & Kashmir, Muzaffarabad, AJK

ADDITIONAL

Languages: English (Professional), Urdu (Native)

Availability: Open to internships and junior developer roles worldwide.
